GALLOPING TO GIVE CORONAVIRUS STATEMENT

Last updated 21st October 2020

In spite of the current complex climate as a result of Coronavirus, Galloping To Give is working tirelessly to create a safe environment for their clients.

To reassure our clients we have put together this document highlighting the company's commitment to organising safe visits as well as keeping you informed of any changes in Government advice.

Existing or potential clients who live in an area currently under regional or local restrictions are reminded to follow the Government advice in that area.

If your visits are unable to be fulfilled because of Coronavirus then Galloping To Give will happily reschedule your visit.

Further information about the latest Coronavirus advice can be found https://www.gov.uk/coronavirus

Galloping To Give encourage all clients to adhere to the following regulations:
- HANDS - Wash your hands regularly and for 20 seconds in advance of your arrival
- FACE - Wear a face covering in indoor settings where social distancing may be difficult, and where you will come into contact with people you do not normally meet.
- SPACE - Stay 2 metres apart from people you do not live with where possible

If you have coronavirus symptoms:
- a high temperature
- a new, continuous cough
- a loss of, or change to, your sense of smell or taste

Get a test and for the safety of everyone please stay at home.

- Indoor contact will be limited as the majority of the time spent at morning on the gallops tours will be outside
- Galloping To Give will at all times be sensitive to the numbers involved in the tours however as these are for work purposes then we are permitted to be above the current 'rule of six' as advised by the Government.
- We will ensure at least one person in each group provides their contact details so that you can be contacted if needed by the NHS Test and Trace programme.
- In light of the ever changing nature of the Coronavirus advise this document will be regularly reviewed and updated when appropriate. You can see when the document was last updated at the top of the page
